The Intelligent, Trusted Way to Sign & Manage Documents

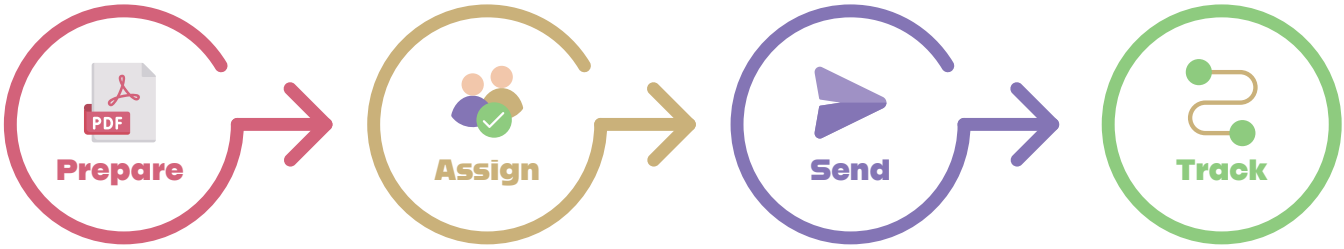

Transform How Your Corporate Signs, Approves and Tracks the Agreement or Contract

NEXSIGN

NexSign is an enterprise-grade digital signing platform that integrates with trusted, recognized Certificate Authorities and digital identity services Unlike cloud-based signing solutions, NexSign requires no document uploads: signers complete the entire process locally on their own device through recognized signing authorities, so your documents never leave your environment and there is zero risk of data leakage — enabling your organization to sign, verify, and audit documents on a trustworthy platform with complete legal compliance and confidence.

How It Works In 4 Steps

Use approved template

Define roles and sequence

Automated signature notifications

Real-time status across signers

Instant Signature Validation & Verification

Enable seamless, independent verification of signed agreements across your devices. NEXSIGN checks each signature against trusted Certificate Authorities, instantly confirming document integrity while ensuring highly confidential files remain strictly private, locally processed, and never exposed to any third party throughout the entire signing process.

Local-Execution Privacy

Workflow executes locally on your device, guaranteeing confidential content never leaves your environment.

Multi-Layer Verification

Check content integrity, certificate chains, timestamps, revocation status, and expiry.

Defensible Audit Trails

Tamper-proof logs track every action for compliance and dispute resolution.
